Parshan Pakiman

EDUCATION

University of Illinois at Chicago (UIC), Chicago, IL

Ph.D. in: Information and Decision Sciences

Thesis title: Mitigating Model Risk in Reinforcement Learning: Self-adapting Methods with

Applications in Operations and Finance

Co-advisors: Professors Selva Nadarajah and Negar Soheili

University of Illinois at Chicago, Chicago, IL

M.Sc. in: Business Analytics

University of Tehran, Tehran, Iran

B.Sc. in: Mathematics and Applications

Spring 2017 -(Expected) Fall 2022

Spring 2017 -(Expected) Fall 2022

Fall 2012 - Fall 2016

RESEARCH INTERESTS

- Working towards off-the-shelf reinforcement learning (RL) algorithms that mitigate model selection and parameter hand-engineering, making RL accessible to non-experts.
- Modeling sequences of decisions made by a human agent via inverse RL and data-driven optimization and then
 embedding these models in downstream optimization problems for computing decisions that either maximize
 a reward or balance competing objectives.
- Tackling real-world problems arising in finance and operations such as dynamic pricing with demand learning, options pricing, marketing campaign optimization, inventory control, and balancing financial and social objectives for e-commerce.

WORK EXPERIENCES

Worked in the Advanced Solutions team at Guidehouse (Link) as a research intern and developed an RL algorithm for workflow scheduling problem (a related research paper in preparation).

Collaborated with a major e-commerce company to design a framework that learns the behavior of packaging
workers from the cardboard boxes they select to pack customer orders and then uses the model of worker
behavior to reduce packaging waste while maintaining high worker throughput.

Since Spring 2021

Worked with Foresight ROI (Link) to design a framework for mining past marketing data via inverse RL and for optimizing future marketing campaigns using RL (Link to the resulting paper published in KDD 2019).

Fall 2017 - Summer

 Collaborator on a multi-university and industry initiative to develop an open-source reinforcement learning and approximate dynamic programming platform for operations and finance applications.

Fall 2019

Teaching experience in graduate classes such as Optimization for Analytics, Statistical Learning, Intro to Machine Learning, Business Data Mining, and Intro to Operations Management.

Since Fall 2017

AWARDS AND HONORS

BGS¹ membership: College of Business, University of Illinois at Chicago
Doctoral fellowship: Department of Information and Decision Sciences, University of Illinois at Chicago
Best student scholarship: Department of Mathematics, Statistics and Computer Science, University of Tehran
Technical qualification: Technical qua

TECHNICAL SKILLS

Programming language: Python, R, C++, C, Java, HTML, JavaScript

Python package: PyTorch, Scikit-learn, Autograd, NumPy, SciPy, Numba, Pandas, Matplotlib, etc

Optimization solver: Gurobi, Nevergrad, CVXPY, Pyomo, OR-Tools

Operating systems: Linux, MacOS, Windows

Journal Paper

- P. Pakiman, S. Nadarajah, N. Soheili, Q. Lin. Self-guided Approximate Linear Programs (Link). Under third round review at Management Science.
- B. Chen, S. Nadarajah, P. Pakiman, S. Jasin. Self-adapting Robustness in Demand Learning (Link). Under revision for resubmission to Operations Research.

Conference Paper

- A. Chenreddy, P. Pakiman, S. Nadarajah, R. Chandrasekaran, R. Abens. SMOILE: A Shopper Marketing Optimization and Inverse Learning Engine (Link). Proceedings of the 25th ACM SIGKDD International Conference on Knowledge Discovery & Data Mining, 2019. Acceptance rate 6.4%.

Work in Progress

- P. Pakiman, S. Nadarajah, Y. F. Lim. Menu Optimization with Decision Learning: Application to Sustainable Warehousing. In preparation for submission to Management Science.
- P. Pakiman, S. Nadarajah, N. Soheili. Self-guided Approximate Linear Programs for Average-Cost Markov Decision Processes. In preparation for submission to INFORMS Journal on Computing.
- S. Nadarajah, P. Pakiman. Self-guided Least Squares Monte Carlo for Financial and Real Options. Working paper.
- P. Pakiman, C. Landau, B.Haidar, S. Nadarajah. A Simulation-based Reinforcement Learning Approach to Workflow Scheduling. Working paper.

Workshop Paper

- P. Pakiman, S. Nadarajah, N. Soheili, Q. Lin. Self-guided Approximate Linear Programs (Link). Accepted in NeurIPS Workshop on Self-Supervised Learning – Theory and Practice, 2020.

INVITED TALKS

Decision Learning with Menu Optimization	
 INFORMS Annual Meeting, Indianapolis, IN 	Fall 2022
 POMS 32nd Annual Conference, Virtual 	Spring 2022
 POMS 31st Annual Conference, Virtual 	Spring 2021
Self-guided Approximate Linear Programs	
 INFORMS Optimization Society (IOS) Conference, Greenville, SC 	Spring 2022
 INFORMS Annual Meeting, Anaheim, CA 	Fall 2021
 POMS 30th Annual Conference, Washington D.C. 	Spring 2019
 INFORMS Annual Meeting, Phoenix, AZ 	Fall 2018
 POMS 29th Annual Conference, Houston, TX 	Spring 2018
Self-adapting Robustness in Demand Learning	
 INFORMS Annual Meeting, Virtual 	Fall 2020
 INFORMS Revenue Management and Pricing Student Live Paper Series, Link, Virtual 	Fall 2020
Self-guided Least Squares Monte Carlo for Financial and Real Options	
 POMS 32nd Annual Conference, Virtual 	Spring 2022
SMOILE: A Shopper Marketing Optimization and Inverse Learning Engine	
$-$ ACM SIGKDD, International Conference on Knowledge Discovery & Data Mining, ${\sf Link},$ Anchorage, AK	Summer 2019
OSTER PRESENTATIONS	
Self-guided Approximate Linear Programs	

PO

- NeurIPS 2020, Workshop on Self-Supervised Learning - Theory and Practice, Link, Virtual

Fall 2020

SMOILE: A Shopper Marketing Optimization and Inverse Learning Engine

ACM SIGKDD, International Conference on Knowledge Discovery & Data Mining, Link, Anchorage, AK

Summer 2019

TEACHING EXPERIENCES

Lecturer, University of Illinois at Chicago

- Since Spring 2019
- Optimization for Analytics (IDS 435), Linear Regression and Subset Selection in Gurobi, session 1, session 2.
- Business data mining (IDS 472), three-week refresher on coding in R, slides for week 1, week 2, and week 3.
- Statistical models and methods for business analytics (IDS 575), refresher series on linear algebra, calculus, and probability theory.
- Statistical models and methods for business analytics (IDS 575), applications of regression, classification and likelihood maximization, slides.

Teaching Assistant, University of Illinois at Chicago

- Advanced text analytics for Business (IDS 566)
- Business data mining (IDS 472)
- Business forecasting (IDS 476)
- Optimization for Analytics (IDS 435)
- Data science for online customer analytics (IDS 594)
- Introduction to operations management (IDS 532)
- Statistical models and methods for business analytics (IDS 575)

Teaching Assistant, University of Tehran

- Introduction to numerical analysis and scientific computing
- Numerical linear algebra

SERVICE

Reviewer

- Information Systems Research (ISR)

International Conference on Learning Representations (ICLR)

Annals of Operations Research

 $-\,$ Computers & Operations Research

Electronic Commerce Research

Information Systems and Operational Research

Conference Organization

Session co-chair, Large-scale Linear Programs and Applications, INFORMS Optimization Society Conference

- Session chair, Recent Advances in Reinforcement Learning, INFORMS Annual Meeting

- Session co-chair, Social Responsibility and Risk in Supply Chains, INFORMS Annual Meeting

Membership

INFORMS Chicago Chapter Ambassador

- IDS committee for organizing curriculum of *programming in R*

- Beta Gamma Sigma (BGS) society

Institute for Operations Research and the Management Sciences (INFORMS)

Production and Operations Management Society (POMS)
